All letters and communications to be addressed to W. H. HALDEMAN,
Court Street Printing House,
51 and 53, Third street, near Main,
Louisville, Ky.

Our Two Editions.

Be ready to take all the materials of the *WEEKLY COURIER* are printed--one on Wednesday and the other on Saturday. Subscribers can order the one that will best suit their convenience.

Notice!

All papers are invariably discontinued at the expiration of the time paid for. The very low price of the paper compels us to make that rule imperative.

For papers ordering their papers changed, are to name the Post Office where it is received, as well as the one to which it is to be sent.

We never send back numbers of the *WEEKLY COURIER* to new subscribers unless specially ordered. Those who wish to have *Mattox's* story from the commencement, are to name the Post Office where it is received, as well as the one to which it is to be sent.

For subscribers can remit postage stamps when convenient. By sending them, they will have no difficulty in making change for the fractional parts of a dollar.

AN EXCITING NEW BOOK!

SAM:

OR THE

HISTORY OF MYSTERY!

We have only time to announce this week that

we have succeeded, at a heavy outlay, in

in purchasing the manuscript of a new work under the above title, the publication of which will be com-

menced in the *COURIER* in a few weeks. The

story will run through some eight or ten numbers,

and will be of great interest and exciting interest. It is

written by a gentleman of distinguished literary po-

sition, who has published a number of books of

great popularity and acknowledged worth. He has

already made his mark, and the new book will add

to his already high reputation.

The book will contain a full history of Sam, the

Jesus, &c., from the earliest period to the present time. It will be of exciting interest, and, as it

will refer particularly to the new political movement

which is now attracting so large a share of the pub-

lic attention, it will be eagerly sought after and gen-

erally read.

In a week or two we will lay before our readers

the headings of the several chapters, in order that

they may be able to form a correct idea of the char-

acter of the work. We make this notice thus early

in order that our friends may at once fill up their

books. It is necessary we should know the extent

of the entire edition we will have to print, and

those who wish to have the story from the begin-

ning, and thus avoid disappointment, should send in

their names at once.

Important Discoveries Patented--Revelations in

Tantrum Leather.

Within the past eighteen months there have been frequent disclosures in the *Courier* to the important scientific discoveries connected with the art of tanning leather, citizen--I. Woodward Fiske, Esq., We have highly gratified in being enabled to announce that after an extraordinary and patient examination by the officers, letters patent have been issued to the discoverer, for two improvements in the tanning and curving of leather. These will be likely to work an entire revolution in the trade, and if Mr. Fiske meets with just deserts his discoveries can but realize for him a fortune.

MORGAN FOUND. The Masonic Mirror pub-

lishes a rather curious story to the effect that

Morgan, who was alleged, was murdered by

the Free Masons, for disclosing their secrets, has

been found in Smyrna, in Turkey--that he now

goes by the name of Mustapha, and is engaged in

teaching the English language. The authority given in this report is one Joseph A. Bloom.

The Louisville Courier announces by authority, S. F. TRABE, Esq., of Franklin or Compton, in the (9th) Dist., that he is to be a candidate for Congress in the Eighth District, at the election in August next.

Mr. TRABE is well known to the voters of that

district, and to the people of Kentucky, as a man

of great ability, untiring energy, and indomitable

spirit. Contending against powerful party or-

ganizations, he some years ago made two most

gallant races for Congress, and although in both

instances he was defeated by a few hundred

votes, yet he surprised both friends and enemies

by the large support he command, fighting as he

did, alone, and without any organized party to

aid him. The story of his life is a brilliant

one, and it will be easily sought after and gen-

erally read.

Mr. F. now has two applications before the

department at Washington awaiting examination.

All his processes will be published in a work

clearly treating what he has by a long course of

study and demonstration worked out. This vol-

ume will be of invaluable service to those engaged

in producing this important article of domestic

manufacture, which is already produced by actual

results attained in a large and regular business.

We know from gentlemen who have thoroughly

tested the wearing qualities of the leather produced

by Mr. Fiske's theory that it is superior for

shoeing, wear, pliability, wear and fitness, and

we have examined numerous testimonies from

practical tanners and curriers setting forth an

almost incredible saving of labor, besides saving

the market value is enhanced, and the time

required for producing is greatly reduced.
